

Biological Treatment System

Biological Treatment Specifications

- Flow rate capacity 150 gpm
- Influent feed pump system
- Integral pH adjustment tank with mixer
- Integral flocculation tank with two variable speed mixers
- Aeration capabilities
- Oil skimming compartment
- Clarification compartment
- Settled solids withdrawal header piping
- Settled solids withdrawal pump system
- Three pressure sand filters
- Automated filter feed tank and pumping system
- Sock filter
- Removable safety rail system
